EDUCATION

California State University, Fullerton   Fullerton, CA
Bachelor of Science in Computer Science   *May 2024*

WORK EXPERIENCE

Association for Computing Machinery at CSUF   Fullerton, CA
Dev Team Lead   *August 2023 - Present*

- Led numerous workshops (e.g., REST API) to help members learn new technologies and best practices.
- Implemented a CI/CD pipeline for our servers, reducing deployment time and increasing reliability.

Google   Sunnyvale, CA
Software Engineer Intern   *May 2023 - August 2023*

- Developed a high-performance, parallel, and distributed pipeline using Go and Apache Beam to reconcile massive internal log databases with Certificate Transparency logs.
- Improved the security of the certificate issuance pipeline by ensuring the authenticity of certificates issued by Google and preventing missing entries in Certificate Transparency logs.
- Achieved exceptional efficiency, with the pipeline processing millions of log entries in under a minute and running at regular intervals for ongoing security assurance.

Google   Seattle, WA
STEP Intern   *May 2022 - August 2022*

- Rewrote and modernized a Kubernetes node monitoring tool in Go and integrated it with internal infrastructure and telemetry collector for real-time tracking and performance analysis.
- Led the redesign and development, collaborating with the original team to ensure objectives were met.
- Achieved more reliable system monitoring with better error handling, consistent status reporting to multiple outputs, and valuable telemetry for internal dashboards, reducing on-call resolution time.

ShiHoYa Inc.   Remote
Backend Developer   *Feb 2019 - Sep 2020*

- Restructured and refactored Go codebase for improved maintainability and adherence to style guides.
- Designed and implemented an automatic CI/CD pipeline for deploying latest releases to AWS EC2 instances using Nix, enhancing development speed and enabling rapid testing by other teams.

PROJECTS

Dissent | *Go, C, GTK4*   diamondburned/dissent ⌗
Native chat application made by reverse-engineering Discord with 800+ stars on GitHub.

acm-aws | *Terraform, NixOS, GitHub Actions*   diamondburned/acm-aws ⌗
Infrastructure-as-code for ACM at CSUF with CI/CD pipelines for AWS and bare-metal.

Layover Party | *Python, FastAPI, OpenAPI, Flutter*   layover.party ⚲
Full-stack web/mobile application to match people with long layover flights, won LAHacks 2023.

SKILLS

Languages: Go, Bash, JavaScript, TypeScript, Nix, C, C++, Python, SQL, HTML, CSS
Databases: PostgreSQL, SQLite, MariaDB, BadgerDB, Redis, InfluxDB
Cloud/Infra: Terraform, AWS, GitHub Actions, GitLab CI, Prometheus, Grafana, Apache Beam, Telegraf
